

Brussels, 16 April 2021

To:

Frans Timmermans, Executive Vice-President in charge of the European Green Deal
Virginijus Sinkevičius, Commissioner for the Environment, Oceans and Fisheries

CC:

Diederik Samsom, Head of Vice-President Timmermans' cabinet
Marius Vaščega, Head of Commissioner Sinkevičius' cabinet
Florika Fink-Hooijer, Director General of DG Environment
Mattia Pellegrini, Head of Unit B.3., DG Environment, Waste Management and Secondary Materials

Subject: The packaging value chain calls on the European Commission to dedicate appropriate time and resources to review the Packaging and Packaging Waste Directive

Dear Executive Vice-President Timmermans, dear Commissioner Sinkevičius,

The undersigned associations representing the packaging value chain are writing to you to voice their concerns regarding the timing and resources allocated to the review of the Packaging and Packaging Waste Directive.

Our organisations fully support the objectives of the new Circular Economy Action Plan and believe that the upcoming revision of the Packaging and Packaging Waste Directive represents a key opportunity to accelerate and further scale up the circularity of the EU economy. To this end, the ambitious policy goals must be supported by robust legislation, providing a future-proof regulatory framework driving investment in innovation and ensuring stronger enforcement and harmonisation across the EU. A lot is at stake and the review of this Directive is too important to fail.

The complexity of the measures requires a thorough and evidence-based impact assessment. This must be supported by a regular dialogue and effective consultations with all relevant stakeholders. We are concerned that the limited number of planned stakeholder workshops coupled with the indicative timeline raise the likelihood that these conditions cannot be met satisfactorily ahead of the planned adoption of the legislative proposal by the end of this year.

Rushed decision-making processes tend to result in insufficiently defined regulatory measures requiring further clarification through additional provisions. These are often delayed well-beyond the official deadlines set to ensure their timely and harmonised transposition across the EU. The Single-Use Plastics Directive and severe delays with the adoption of its implementing acts and guidelines set a concerning precedent in this regard.

Given the breadth and complexity of the Packaging and Packaging Waste Directive review, and the numerous legislative files being reviewed in relation to the Circular Economy Action Plan, it is essential to

foresee sufficient time and resources, as recently voiced by the European Parliament in its Resolution on the New Circular Economy Action Plan¹.

We would very much welcome the opportunity to exchange views on these critical issues with you and your services and we remain committed to support the Commission with a successful review.

Yours sincerely,
